PROJECTS

- **Filipino Alamat**:

  This is an android application repository for Filipino Alamat stories. With this app, it helps students when they have school projects about folklore. The app is also open to those who wanted to make and submit their own stories. I successfully launch this app in the google play store and in about 3 months I scale the app to 50,000 downloads and continues to grow on its own. Now I am earning through this small app and It helps me to support my web hosting expenses.
  Role: Application Developer
  URL: https://play.google.com/store/apps/details?id=filipino.alamat
  Period: 2 Weeks

- **POSlite**:

  This is a web-based application that I developed using CodeIgniter. This is my first project in my journey in learning web development. I launched this app commercially and attracted local businesses. Now this app is used by several local businesses such as motor parts, groceries and retails stores. This App is a clean and robust software that provide everything to run a small to medium scale business efficiently.
  Role: Application Developer
  URL: https://poslite.herokuapp.com
  Period: 1 Month

- **AHRIS**:

  This is a web-based application developed using Laravel and R programming. This app automates the calculation of attendance and leaves process, software utilized data mining technology to predict employees' tardiness base on the Naive Bayes algorithm.

With this app, Managers and HR professional could forecast their employee's punctuality and reduce the work needed for attendance and leave management.
Role: Application Developer and Researcher
Period: 2 Months
URL: https://hrisa.herokuapp.com/
https://alger.shinyapps.io/tardiness/

- **BestyCoupons**:

  This is a WordPress theme developed for people who want to start their coupons and deals website. With this purpose, the theme has features like add and manage stores, add coupons and deals, redeem coupon, and rating system.
  Role: WordPress Theme Developer
  Period: 1month
  URL: https://bestycoupons.com

- **EMSSG**:

  This is a 3D, first person, Sci-fi, survival mummy shooter game for windows. The game has 4 different enemies with different color and sizes variations. It has endless waves of mummies and each iteration the number of enemy spawn would increase. It has HP rune and power up rune that you can pick up to help you survive the game. This game is for people who just want to pass time and shoot some mummies.
  Role: Game Developer
  Period: 1month

SKILLS

JavaScript – JavaScript es6, Jquery, React

CSS – CSS3, Bootstrap, Materialized

PHP – PHP 7, CodeIgniter, Laravel, WordPress

Database – MySQL, SQLite

Server – XAMPP

Other Skills – Using Git Version Control, Photoshop (I do photo enhancement and creating marketing materials for Facebook ads) and Premier Pro (I do video editing and upload it on my youtube channel), HTML5, API & JSON, experience in implement Google Analytics tracking in ecommerce sites, create a classification data mining tool that predicts employee tardiness based on data collected from an HR system.

WORK EXPERIENCE

- **Zeald – Fullstack Developer (May 2019 – October 2019)**
  - Develope and customize clients' ecommerce websites using HTML, CSS, Javascript ES6, Perl, and JQuery.

- Interfaced with team members and support team on daily basis to provide technological expertise and knowledge.
- Build responsive landing pages using grid system and semantic elements from the designers' mockup design.
- My top projects at Zeald:
    1. Developed Shipping Calculator using Mainfreight API. This project aims to provide customers of an immediate estimate for shipping cost depending on their Cart total weight, volume, and address.
    2. Developed a document manager to give customers access to product documentation. Features include filtering of documents by type, filter by categories, and an option to attach document in a product that will be showed in the product page.
    3. Developed an invoice sender that enables the client to send their customers unpaid orders via email.
    4. And many more customizations.

- **A MARKETING – Owner(Jan 2019 - Current)**
  Achieved 100% customer satisfaction, I did all the shipping/Receiving orders, customer Service and software customization and installation.

- **JT INNOVATORS - Intern (May 2018 – Aug 2018)**
  Bucana, 8000, Davao City, Philippines
